

Undercover growing solutions to help your business flourish

We partner with you every step of the way

From concept to construction, we'll provide you with expert advice and ongoing support to help your business flourish. What's more, in partnership with global irrigation leader Netafim, we offer a range of the highest quality products and systems to meet all of your growing requirements.

About Us

Vegtech is the leading supplier of undercover growing solutions in Southern Africa. We specialise in turnkey projects across Africa and offer an extensive range of agricultural products.

We proudly manufacture in South Africa, and since 1989 we've completed almost 500 greenhouse projects throughout Africa and into the Middle East.

Our Areas Of Expertise

Turnkey Solutions

End-to-end undercover growing solutions designed for your business.

Greenhouse Structures

Advanced structures to meet your budget, climate and crop requirements.

Irrigation

Irrigation and fertigation systems to suit your growing needs.

Climate Control

Smart systems to create the optimal climatic conditions for your crops.

Crop Management Technology

Data-driven products to help you reduce costs and increase your yield.

Growing Products

Tried and tested products, plastics and nets to enhance your growth.

How we cultivate your future growth

We have over 25 years of experience, helping our customers to minimise risk and maximise yield.

- › We understand your local conditions and growing requirements
- › We use advanced technology to design, manufacture and implement the right solutions for your crops
- › We provide expert advice from leading agronomists
- › As Netafim's South African greenhouse partner, our projects utilise only the very best irrigation and crop management solutions
- › We have a vast network of experienced partners throughout Africa and the world
